

# Krishnadev R

## PROFESSIONAL SUMMARY

Dynamic Full Stack Web Developer skilled in building scalable web apps with React.js and Node.js. Adept at seamless integrations, leveraging Generative AI, and quickly adapting to new technologies.

## PROJECTS

### 1. Dropify - traffic relief application | 🌐 | 📱

- Collaborated with a small team to develop a real-time platform that integrates on-demand deliveries and transport options.
- Designed and implemented efficient server-side APIs with Node.js and Express.js for seamless integration of live traffic data and services.
- Optimized database models and queries using MongoDB to handle complex data for route optimization and traffic predictions.
- Implemented Socket.io for real-time communication, enabling users to report and receive live traffic updates.

### 2. Code Fit | 🌐 | 📱

- Collaborated with a small team to develop a platform that analyzed GitHub profiles to provide recruiters with data-driven insights into candidates' commit history, pull requests, and repository activity.
- Developed a benchmark system that allows recruiters to define evaluation criteria, enabling more precise and insightful candidate assessments.
- Generated detailed candidate reports with repo contributions, commit frequency, and PR activity for easy side-by-side comparisons.
- Implemented a tracking system to maintain a list of hired candidates, facilitating future reference and insight into past hiring decisions.
